PROJECT WORK

Online Donation System, Node.JS, Laravel
- A SaaS (software as a service) application that manages peoples donation using two different technologies, Node.JS and Laravel along with HTML5, CSS3, JavaScript ES 6, PHP, Bootstrap 4, jQuery, Ajax, MySQL, Microservices, API.
- Git Repository: Crowd Funding (NodeJS, Laravel), Crowd Funding (Node.js)

Job Post Web Api, .Net Core, Angular (**under construction**)
- A simple restful web api with proper authentication and authorization (Identity) for managing job post. This is for my learning purpose. The backend is created with asp.net core and the frontend is made with angular.
- Git Repository: Job Post Api

FarmNet Web Application, asp.net core, bootstrap, jquery
- A web application for the farmers and the consumers where the farmer can register their farm and consumer can invest in that. This project is for the client of codesource. (**Under construction**).
- Link: FarmNet Asia

E-commerce website for cloths, asp.net mvc
- A web application built on .NET Framework where almost all the functionality of an e-commerce are implemented. Almost all the necessary function of an ecommerce has been implemented such as category-based product, discount, review, compare products, cart, checkout, payment with PayPal, reports, profile. There is a huge use of ajax and jQuery.
- Git Repository: E-Commerce (Asp.net mvc)

E-commerce website for cloths(api), asp.net web api
- A web application built on .NET web api along with frontend system where almost all the functionality of an e-commerce are implemented. The frontend project is constructed with plain html and ajax.
- Git Repository: E-Commerce (Asp.net web api)
